*"Victoria is a fantastic photographer who has the ability to bring the best out in her subjects (especially little ones!). My children had a great fun photo shoot with her and she made them feel really comfortable and relaxed. We were so pleased when we saw the final product. We love our photographs and will be using Victoria again as the children get older. We would highly recommend Victoria B Photography to anyone who is looking for a photographer who can take fantastic pictures that capture those special people and moments in your life." by Lynn Witten, May 2010*
